Himanshu Parag Baheti

Dublin, Ireland | +353-892513513 | himanshupbaheti@gmail.com | LinkedIn

Professional Summary

Data Engineer with experience building scalable data pipelines and production-grade systems in enterprise environments. Skilled in Databricks, PySpark, Delta Live Tables (DLT), and Azure Data Factory. Proven track record of processing high-volume datasets, implementing governance frameworks, and improving automation to enhance data reliability and operational efficiency. Adept at translating business requirements into robust, scalable data solutions.

Technical Skills

Programming:	Python, T-SQL, PostgreSQL, PySpark
Data Engineering:	ETL Pipelines, Streaming, Delta Lake, DLT, Data Modeling, RBAC, CI/CD
Cloud & Platforms:	Databricks, Azure Data Factory, Salesforce Data Cloud(CDP), Power BI
Databases:	SQL Server, MySQL

Professional Experience

Senior Data Engineer **2024 – 2026**

Bajaj Finserv *Full-Time*

Recipient, Bajaj Finserv "Heroes Award" (x2) for Exceptional Performance, Sep 2025 and Apr 2026

Communication Governance Framework *(Omnichannel Data Scrubbing — 150M+ records/day)*

- Designed and implemented a unified governance framework to regulate customer communication data across SMS, RCS, WhatsApp, Email, Call Center, and Mobile Notification channels.
- Built ingestion pipelines to process Parquet campaign files into Delta Lake tables, with validation layers covering filename, schema, and user-level checks.
- Engineered hard rejection logic (DNC, TRAI block, regulatory filters) and soft rejection logic using monthly and daily communication capping rules.
- Integrated all communication channels into a scalable PySpark-based framework processing 150M+ records daily with no observable latency, improving compliance adherence and reducing regulatory risk.

Unified Campaign Manager *(Vendor-Centric Delivery Pipeline)*

- Architected vendor-centric delivery pipelines to generate channel-specific communication files and trigger vendor SFTP/API integrations (Sinch, Netcore, CleverTap, and others) post-governance processing.
- Developed dynamic content generation logic, including SMS variable rendering, WhatsApp/RCS template generation, email body formatting, and mobile notification structuring.
- Built Smart Scheduling functionality enabling campaign chunking and timed communication delivery for better campaign control.
- Implemented transformation and automation workflows, reducing manual campaign configuration effort by 60%.

Salesforce Data Cloud Integration *(Customer Data Platform)*

- Built data synchronization pipelines to onboard enterprise Data Lake tables into Salesforce Data Cloud for customer segmentation and activation, using Apache Iceberg table integration and Azure Blob-based ingestion.
- Synced 500M+ customer profiles (mobile and demographic data) daily and 1B+ customer offers every four hours, reducing overall campaign turnaround time by 70%.
- Worked extensively on Data Streams, Data Lake Objects, Data Models, Segments, and Activations within Salesforce, collaborating with business stakeholders to enable no-code targeting workflows.

Data Engineer Intern **2024**

Bajaj Finserv *Internship*

- Assisted in onboarding enterprise datasets into Salesforce Data Cloud using Databricks and Azure Data Factory, developing SQL transformation logic and supporting schema validation.
- Gained hands-on experience with production-grade ETL workflows, governance frameworks, and cloud-based data platforms.

Education

MSc. Data and Computational Science 09/26 – 09/27

University College Dublin

Bachelor of Engineering in Information Technology *(Honors in Data Science)* 07/20 – 06/24

Pune Institute of Computer Technology CGPA: 9.11/10 (First Class Honours equivalent)

Certifications

- Introduction to Statistics — Stanford University (Coursera)
- Complete Machine Learning & Data Science Bootcamp 2023 — Udemy
